Rozbor výskytu chorôb z povolania a profesionálnych otráv v SR za rok 2009

V roku 2009 bolo v Slovenskej republike hlásených 483 prípadov hlásených chorôb z povolania a profesionálnych otráv, pričom z celkového počtu novozistených prípadov sa ženy podieľali 40,7 % (t.j. 197 prípadmi).

V porovnaní s rokom 2008 s celkovým počtom 429 hlásených novopriznaných chorôb z povolania došlo v roku 2009 k vzostupu hlásených chorôb z povolania o 54 prípadov, čo reálne predstavuje vzostup o 12,6 %, ktorý však nedosahuje počet hlásených chorôb v roku 2007, ide o pokles dosahujúci tretiu najnižšiu úroveň hlásených chorôb z povolania za posledných 10 rokov (v roku 2005 bolo hlásených 413 prípadov novozistených chorôb z povolania).

V konsenze s minulými rokmi, pri nezmenených kritériách posudzovania chorôb z povolania, sa na vzostupe v roku 2009 na chorobách z povolania najviac podieľali profesionálne ochorenia postihujúce podporno-pohybový systém, cievny a nervový systém zamestnancov vystavených v práci nadmernému zaťaženiu horných končatín a škodlivému vplyvu vibrácií s celkovým počtom hlásených 293 prípadov (t.j. vzostupom o 7 % v porovnaní s hlásenými 274 prípadmi v roku 2008).

Výraznejší trend pozorujeme pri poškodení sluchu hlukom, kde pri celkovom počte 36 prípadov hlásených chorôb z povolania pod položkou 38 došlo k vzostupu o 118 % v porovnaní s priemerným počtom hlásených poškodení hlukom v roku 2008.

Najväčší podiel na chorobách z povolania v roku 2009, podobne ako v minulých rokoch, má choroba kostí, kĺbov, šliach a nervov končatín z dlhodobého, nadmerného, jednostranného zaťaženia horných končatín s celkovým počtom 209 hlásení, čo predstavuje 43,3 % celkového počtu hlásených profesionálnych ochorení. V porovnaní s rokmi 2006, 2007 a 2008 pozorujeme naďalej zachovávaný trend v zastúpení najčastejšie hlásených chorôb z povolania.

Na druhom mieste v roku 2009 sa pri celkovom počte 84 hlásených prípadov umiestnilo ochorenie kostí, kĺbov, svalov, ciev a nervov končatín spôsobené pri práci s vibrujúcimi nástrojmi (položka č. 28 prílohy č. 1 zákona 461/2003 Z. z.), ktoré v roku 2009 predstavuje 17,4 % z celkového počtu chorôb z povolania na Slovensku.

Závažnosť perzistujúceho problému vysokého podielu výskytu profesionálnych chorôb postihujúcich podporno-pohybový systém, cievny a nervový systém zamestnancov vystavených v práci dlhodobému, nadmernému a jednostrannému zaťaženiu horných končatín a škodlivému vplyvu vibrácií podčiarkuje skutočnosť, že tieto sa podieľajú v roku 2009 na 60,7 % z celkového počtu chorôb z povolania. V porovnaní s rokom 2008, kedy bolo hlásených 65,7 %, prvýkrát zaznamenávame klesajúci trend relatívneho zastúpenia z celkového počtu hlásených chorôb z povolania.

Treťou najčastejšou chorobou z povolania, s vysokým odstupom od ochorení podporo-pohybového systému, sú infekčné choroby a parazitárne choroby vrátane tropických infekčných chorôb a parazitárnych chorôb a chorôb prenosných zo zvierat na ľudí (po-ložky č. 24 – 26 prílohy č. 1 zákona 461/2003 Z. z.) s celkovým počtom 52 hlásených chorôb z povolania, z ktorých najčastejšie boli hlásené infekčné a parazitárne choroby (71 %).

V poradí ďalšou chorobou z povolania s celkovým počtom 36 hlásených prípa-dov je už spomínaná porucha sluchu z hluku, ktorá tvorí iba 7,5 % hlásených chorôb z povolania.

Pri stabilizovanom počte 33 prípadov profesionálnych pneumopatií ochorení hor-ných dýchacích ciest (s mierne zvyšujúcou sa tendenciou v hlásených profesionálnych prieduškových astmách) nebol vzhľadom k zvyšujúcej sa prevalencii alergických ochorení v populácii zaznamenaný očakávaný vzostup.

Najčastejšie boli chorobou z povolania v roku 2009 postihnutí pracujúci medzi 50. – 59. rokom života, s miernym posunom do vyšších vekových skupín v porovnaní s predchádzajúcimi rokmi, čo predstavuje 46,4 % hlásených chorôb z povolania.

Podobne ako v roku 2008 bol v SR najvyšší výskyt chorôb z povolania v celkovom počte 123 hlásený u robotníkov pri ťažbe surovín a stavebných robotníkov.

Pri hodnotení zdravotníckej organizácie, ktorá hlásila chorobu z povolania v jednot-livých krajoch, bol v roku 2009 najvyšší výskyt chorôb z povolania v Košickom kraji (162 hlásení s nárastom o 17,4 % oproti roku 2008), v Banskobystrickom kraji (122 hlásení) a Žilinskom kraji (111 hlásení).

Aj napriek miernemu vzostupu hlásených chorôb z povolania otázkou zostáva reálny obraz profesionálneho poškodenia zdravia z práce spojený s diagnostikou a následne objektivizáciou príčinnej súvislosti. S tým súvisí aj vytvorenie špecializovaných centier, zaoberajúcich sa uvedenou problematikou.

Analysis of occupational diseases and professional poisoning incidence in SR in 2009

In the year 2009 was reported 483 cases of reported occupational diseases and professional poisoning in the Slovak Republic, women shared from the total number of newly reported cases 40,7 % (i. e. 197 cases).

In comparison with the year 2008 when the total number of reported newly granted occupational diseases was 429 in the year 2009 came at increasing of reported occupational diseases by 54 cases; it represents increasing by 12,6 %, but doesn't reach number of reported diseases in the year 2007. It represents the third lowest level of reported occupational diseases in recent 10 years (in the year 2005 was reported 413 cases of newly reported occupational diseases).

In consensus with past years, the biggest increasing of occupational diseases in the year 2009 by untouched criterias of considering occupational diseases, the most shared occupational diseases were professional diseases affected supportive-locomotive system, vassal and nervous system of employees exposed of work excessive loading of upper extremities and harmful impact of vibrations with total number of reported cases 293 (i. e. increasing by 7 % in comparison with 274 reported cases in the year 2008).

The marked trend is surveyed by hearing disorders from noise where by total number 36 cases of reported occupational diseases at the item 38 came to increasing by 118 % in comparison with average number of reported harms caused with noise in the year 2008.

The biggest rate of occupational diseases in the year 2009, similarly to past years, has disease of bones, joints, tendons and nerves of extremities from long-term, excessive, one-side loading of upper extremities with total number 209 reports, it represents 43,3 % total number of reported professional diseases. In comparison with years 2006, 2007 and 2008 there is spotted continued trend of the most frequent reported occupational diseases.

The second position in the year 2009 achieved, with total number of 84 reported cases, disease of connective tissues and nerves of upper extremities from work with vibrating tools (item No. 28, enclosure No.1, the Act 461/2003 Code of Act) what represents 17,4 % from the total number of occupational diseases in Slovakia in the year 2009.

Seriousness of persisted problem of high ratio incidence of occupational diseases affecting supportive-locomotive system, vascular and nervous system at professions exposed long-term, excessive and one-side loading of upper extremities and harmful influence of vibrations underlines fact that these diseases comprise 60,7 % of total number of occupational diseases in the year 2009. In comparison with the year 2008 when was 65,7 % reported cases, it is the first time reported decreasing trend of relative amount of total number of reported occupational diseases.

The third most frequent occupational disease with high distance from diseases affecting supportive-locomotive system are infective and parasitic diseases including tropical infective diseases and parasitic diseases and diseases communicable from animals on people (items No. 24 – 26, enclosure No.1, the Act 461/2003 Code of Act), total number 52 reported occupational diseases of which infective and parasitic diseases were the most reported diseases (71 %).

In rank next of occupational disease, with the total number 36 reported cases of hearing disorder from noise as it has been already mentioned and which represents only 7,5 % reported occupational diseases.

By constant number (33) cases of professional pneumonopathy diseases upper respiratory tracts (with slightly increasing trend of reported cases of professional bronchial asthma) there was reported any expected rise in population inspite of increasing prevalence of allergic diseases.

In the year 2009 the most frequently affected group by occupational disease was employees between 50th – 59th year of their life with slight shift among highest age groups in comparison with previous years; it represents 46,4 % reported of occupational diseases.

It is look like in the year 2008 the highest incidence of occupational diseases in total number 123 cases was reported among workers in mining raw materials and construction workers in the Slovak Republic.

By ranking of health organization which reported occupational disease in particular counties was incidence of occupational diseases the highest in the year 2009 in Košický (162 reports with increase by 17,4 % opposite the year 2008), Banskobystrický (122 reports) and Žilinský (111 reports).

Inspite of slight increasing of reported occupational diseases there is remaining question on a real picture of professional harm of health together with diagnostic and objectification of causality. Creation of specialized centres dealing with above mentioned problem is related herewith.

|-----------|--|--|
| 1 | Choroba z olova alebo z jeho zlúčenín | <i>Diseases from lead and its alloys and compounds</i> |
| 1-1 | Otravy olovom a jeho anorganickými zlúčeninami a zliatinami | <i>Poisonings with lead and its inorganic compounds and alloys</i> |
| 1-2 | Otravy organickými zlúčeninami olova | <i>Poisonings with organic compounds of lead</i> |
| 2 | Choroba z fosforu alebo z jeho zlúčenín | <i>Diseases from phosphor and its compounds</i> |
| 2-1 | Otravy fosforom a jeho anorganickými zlúčeninami | <i>Poisonings with phosphor and its inorganic compounds</i> |
| 2-2 | Otravy organickými zlúčeninami fosforu | <i>Poisonings with organic compounds of phosphor</i> |
| 3 | Choroba z fluóru alebo z jeho zlúčenín | <i>Diseases from fluorine and its compounds</i> |
| 3-1 | Otravy fluórom a jeho zlúčeninami | <i>Poisonings with fluorine and its compounds</i> |
| 3-2 | Fluoróza | <i>Fluorosis</i> |
| 4 | Choroba z ortuti alebo z jej zlúčenín | <i>Diseases from mercury and from its amalgams and compounds</i> |
| 4-1 | Akútna a chronická otrava ortuťou | <i>Acute and chronic poisoning with mercury</i> |
| 4-2 | Akútne a chronické otravy zlúčeninami ortuti | <i>Acute and chronic poisonings with compounds of mercury</i> |
| 5 | Choroba z arzénu alebo z jeho zlúčenín | <i>Diseases from arsenic and its compounds</i> |
| 6 | Choroba z mangánu alebo z jeho zlúčenín | <i>Diseases from manganese and its compounds</i> |
| 7 | Choroba z kadmia alebo z jeho zlúčenín | <i>Diseases from cadmium and its compounds</i> |
| 8 | Choroba z vanádia alebo z jeho zlúčenín | <i>Diseases from vanadium and its compounds</i> |
| 9 | Choroba z chrómu alebo z jeho zlúčenín | <i>Diseases from chrome and its compounds</i> |
| 9-1 | Poškodenie nosovej priehradky z chrómu | <i>Harm of nasal partition from chrome</i> |
| 9-2 | Ostatné poškodenia z chrómu | <i>Other injuries from chrome</i> |
| 10 | Choroba zo sírouhlíka | <i>Diseases from carbon sulphide</i> |
| 11 | Choroba zo sírovodíka | <i>Diseases from hydrogen sulphide</i> |
| 12 | Choroba z oxidu uhoľnatého | <i>Diseases from carbon dioxide</i> |
| 12-1 | Akútne otravy oxidom uhoľnatým | <i>Acute poisonings with carbon dioxide</i> |
| 12-2 | Chronické otravy a stavy po otrave oxidom uhoľnatým | <i>Chronic poisonings and conditions after poisoning with carbon dioxide</i> |
| 12-3 | Otravy odstrelovými splodinami | <i>Poisonings with explosion's combustion residues</i> |
| 13 | Choroba z kyanovodíka alebo z kyanidov | <i>Diseases from cyan compounds</i> |
| 13-1 | Otravy kyanovodíkom a jeho zlúčeninami | <i>Poisonings with hydrocyanic and its compounds</i> |
| 13-2 | Otravy kyanamidom vápenatým | <i>Poisonings with calcium cyanamid</i> |
| 14 | Choroba z benzénu alebo z jeho homológov | <i>Diseases from benzene and its homologies</i> |
| 14-1 | Akútne a chronické otravy benzénom | <i>Acute and chronic poisonings with benzene</i> |
| 14-2 | Akútne a chronické otravy toluénom | <i>Acute and chronic poisonings with toluene</i> |
| 14-3 | Akútne a chronické otravy xylénom | <i>Acute and chronic poisonings with xylene</i> |
| 14-4 | Akútne a chronické otravy homológmi benzénu | <i>Acute and chronic poisonings with homologies of benzene</i> |
| 15 | Choroba z nitrozlúčenín a z aminoszlúčenín benzénu alebo jeho homológov | <i>Illnesses from nitro- and amino compounds of benzene or its homologies</i> |
| 16 | Choroba z halogenizovaných uhľovodíkov | <i>Diseases from halogenated carbohydrates</i> |
| 17 | Choroba z esterov kyseliny dusičnej | <i>Diseases from nitrate esters of glycerin</i> |
